Products / Services Provided

EXERGY Partners, formed in 1998, is a consulting firm designed to focus on opportunities arising out of utility restructuring, global climate change and energy issues in the built environment. EXERGY Partners provides professional services in the fields of product development, licensing and commercialization, project development, development and applied research, field testing and verification and project management. There are few entities that combine technical knowledge of the energy and building trades with the proven ability to conceptualize, design and produce the products and tools for success.

EXERGY Partners has developed a client base working in the field of refrigeration and HVAC system integration and dehumidification technologies, indoor air quality research and assessment, end-use energy efficiency and the integration of onsite power generation, energy recovery and thermal energy management. EXERGY Partners is providing strategic direction to public and private sector clients on cooling, heat and power (CHP) technologies, applications and deployment.
